## Federal Funding for Guilford County

**Juvenile Justice Intervention and Mediation Clinic at Elon University School of Law in Greensboro** - \$235,000 to mediate among offenders, victims, and parents/guardians to reach an agreement on appropriate redress and constructive interventions. The program would involve judges, district attorneys, counselors in the juvenile justice system, trained law school faculty and students. *(multiple sponsors including Rep. Miller)*

**N.C. A &T Suspension Intervention Program** - \$383,000 for research focusing on assisting students who have been suspended long term from Guilford County Schools. Specifically, fifty (50) students on long term suspension will be recruited to participate in a community service program in exchange for a reduced suspension. While doing community service, these students will work with a technical assistant who will assist them in developing responsibility, maturity, time management skills, coping, social, and other skills needed for everyday life. *(Rep. Miller request)*

**General Dynamics (branch in Greensboro), Autonomous Anti-Submarine Vertical Beam Array** - \$1 million for a project to help develop a common, inexpensive system for both deep water and coastal Anti-Submarine Warfare and defense of the Sea Base from the quiet, diesel submarine threat specifically. The autonomous Vertical Beam Array is a stand-alone, stationary sonar array system that will be deployed from the Navy's new Littoral Combat Ship (LCS) or Trident guided missile submarines (SSGN). *(multiple sponsors including Rep. Miller)*
